THE HEART CENTRE

TAREE • GLOUCESTER • TUNCURRY

All patients referred for Transoesophageal, Treadmill Stress or Dobutamine Stress Echocardiogram will require a referral for a Transthoracic Echocardiogram.

When attending for the Transthoracic Echocardiogram, the patient will receive an appointment for the subsequent investigation along with information, a consent form and instructions regarding the test.

Treadmill and Dobutamine Stress Echocardiogram

As a general rule, for patients with stable chest pain for investigation, Beta Blockers should be ceased 24 hours prior to the test. If unsure about a particular patient, contact Dr Narasimhan, or keep the patient on the medication.
